IIoT device / requester
Gateway (PEP)
Identity-Registry
Trust-Manager
AccessControl (PDP)
1 access request
2 isActive(device)?
3 valid / revoked
identity
4 getScore(device)
5 current trust score
trust
6 checkAccess(device, resource, action)
7 AccessDecision event
policy
8 allow / deny
9 Monitoring / IDS: reportEvidence() to TrustManager; the new score applies to the next request only
Steps 1 to 8 repeat for every request; no session state. Solid: call; dashed: return.
